Wastewater

The Wastewater Department operates and maintains 206 miles of collection system with 13 major pump stations and 14 single-family pump stations. All of these assets eventually flow into the Tryon Creek Wastewater Treatment Plant operated by the City of Portland on Foothills Road. The Wastewater Department also provides information about rodent control, wastewater odor complaints, lateral service connection verification, response to sewer back-ups and overflows, and missing manhole covers.

Operations Division Wastewater Superintendent:
Wayne Benson, (503) 635-0280

  Rat/Rodent Control
  To help control rats and rodents at your home, cover your garbage cans with a tight metal cover. If a can has holes in it, replace it with a new one. Store soap powder, dog food, rabbit food, nuts, and food in rodent-proof containers or in places inaccessible to rodents. Keep your yard clear of dog bones, old vegetables, fallen fruit, etc. Garbage and brush piles attract rodents.

  Wastewater Laterals
  Each home and business in Lake Oswego has a wastewater lateral. It is the smaller (3 or 4 inch) pipe that collects the water and waste from your sinks, showers, toilet, tubs, and any other drains

that carry the wastes from the home to the larger (8 to 36 inch) City of Lake Oswego Wastewater Collection System.
