

Trails and Pathways

In the spring of 1991, the City began the construction of a recreational loop system of pathways around the community. Each loop is designed to connect neighborhoods with schools, parks, and commercial centers. Funding for the majority of the system was provided by the bond measure approved by the voters in 1990. Lake Oswego pathways are multi-use and shared by walkers, runners, bikers, and pets. Please be courteous to all users.

Lake Oswego is pleased to be part of The Intertwine; an ever-growing network of integrated parks, trails and natural areas that will one day soon be the world's greatest system of its kind. Click on Intertwine Website in the Web Links section below to find out more information.

Bicycle and pedestrian counts are now available!
