

Custom Maps

The City's Geographic Information Services Division can create custom maps to fit your need.

- Maps that feature one or more of the following items can be made:
- Base (streets, street names, lot lines, churches, major buildings, parks)
- Addresses
- Two-foot contours
- City and county limits
- Neighborhood association boundaries
- Fire hydrants
- Zoning
- Sensitive lands
- Flood plains
- City owned property
- Wetlands
- Tree groves
- Zip codes
- Sanitary sewer system
- Water distribution system
- Surface water (storm) management system

A variety of scales are available to show the entire city down to a particular neighborhood or property. [Aerial photographs](#) are also available. The City has copies of County tax lot maps and subdivision plats, which show distances and bearings of parcel lot lines and the width of rights-of-way. The City also maintains copies of maps that show all existing public easements in the city.

The price for custom-made maps is negotiable depending on the complexity and size of the desired map.
