

Facilities Division

Facilities Management provides a variety of support functions to the City organization and its facilities. These include the operation, maintenance and repair services of City Hall, as well as providing support services to other City-owned facilities operated by the other City Departments (i.e. ACC, Library, Fire Stations, etc.). This division also completes meeting set-up and tear down services and assists with special deliveries. Facilities Management personnel also provide project management for remodel and repair projects, as well as various construction and deconstruction projects.
