

Household Hazardous Waste Disposal

What is Household Hazardous Waste (HHW)?

HHW products include paint, thinners, solvents, pesticides, herbicides, fertilizers, poisons, automobile fluids, hobby chemicals, some aerosol spray products, and heavy metals found in batteries (automotive and dry cell), fluorescent light bulbs, and electronics. Look for the following warning words on product labels: toxic, caution, corrosive, pesticide, combustible, poison, flammable, warning, or danger. **Never** pour down the sink, discard in the trash, pour into a street drain, or mix together.

Learn more from [Metro's guide to hazardous waste](#) and [tips on less-toxic choices](#) for your home and garden.

How Do I Dispose of HHW?

Unwanted hazardous household products can be properly disposed of at one of [Metro's hazardous waste facilities](#). Contact Metro at 503-234-3000 for hours of operation and fees and how to prepare materials. HHW is accepted at:

- Metro South Station, 2001 Washington Street, Oregon City
- Metro Central Station, 6161 NW 61st Avenue, Portland

Oregon E-Cycles for E-Waste

Electronics, such as TVs and computers, contain hazardous materials. To reduce the amount of toxic materials heading to the landfill, as of January 1, 2010, Oregonians can no longer throw away computers, monitors, and TVs in the garbage. Unwanted computers, monitors, and TVs must be recycled instead. To safely dispose of e-waste, up to seven computers, monitors, laptops and televisions can be recycled for free through [Oregon E-Cycles](#). For more information and to find locations for free disposal of computers, monitors, and TVs, visit the [Oregon E-Cycles web site](#).

Recycle Compact Fluorescent Light Bulbs (CFLs)

It's important [to recycle burned-out \(unbroken\) CFLs](#) so the small amount of mercury can be reclaimed and reused, rather than released into the environment. In addition to CFL recycling available through Metro (see above), some retailers, including ACE Hardware, Home Depot, Lowe's and IKEA offer CFL recycling programs; call your local store for details.

While mercury is hazardous, the small amount of mercury in the bulb is unlikely to cause harm, especially if you take a few simple precautions to ensure safe cleanup of the broken bulb. The Environmental Protection Agency offers [instructions on how to clean up a broken CFL](#).

Recycle Paint

Household Hazardous Waste Disposal

Published on City of Lake Oswego Oregon Official Website (<http://ci.oswego.or.us>)

Recycle your leftover paint with [PaintCare](#), an industry sponsored paint stewardship non-profit program established to manage the reuse, recycling and proper disposal of unused architectural paint. Miller Paint at 544 N. State St. is a PaintCare drop-off site; call 971-204-0007 for details. Paint can also be disposed of at Metro's hazardous waste facilities (see above).
