

Recycling and Reuse Collection Event - Saturday, November 16

This Saturday, November 16, from 2 to 5 pm, the City and Republic Services of Lake Oswego are hosting a unique recycling collection and education event in recognition of America Recycles Day. Many items that cannot be recycled at the curb, such as batteries, compact fluorescent light bulbs (CFLs), eyeglasses, ink cartridges, cell phones, and plastic film, will be collected for reuse or recycling through various collection partners. Plus several non-profits will be accepting items for reuse or as fundraisers, in addition to providing lots of great information and ideas, activities for kids, and more.

Join us at the West End Building in the Willamette Room from 2 to 5 pm and bring your acceptable unique items for recycling or reuse; also learn more about curbside recycling, business recycling, and other great reuse and recycling programs in and around Lake Oswego. There will also be refreshments and a drawing for Portland Trailblazers tickets, compliments of Republic Services!

[Click here](#) for details about items that will be accepted for collection and to learn more about participating organizations.

America Recycles Day is recognized to promote recycling and environmental awareness by Keep America Beautiful. Recycling is one of the easiest things that we can do to help our environment. This is a great time to think about ways that you can reduce waste, reuse as much as possible, and recycle whenever you can.
