

2014 Summer Construction Projects

The Summer 2014 construction season in Lake Oswego will be very busy! City of Lake Oswego contractors will be putting in new infrastructure from May through October. The map shows the locations of those projects, and the table below provides a brief description, timeline, and contact information for each project. The Lake Oswego – Tigard Water Partnership is shown by the blue line for informational purposes, and will be constructed over the next 18-24 months. Project specific signage and information bulletins will be provided on a project-by-project basis as the construction activities get underway.
