# Athletic Field Requirements
# Lake Oswego, Oregon
# 23 June 2001

# Summary technical findings and implications

**Baseball/softball**

1: There are enough total baseball/softball fields in the park and school systems (not accounting for field quality) (576 slot capacity per peak week in June) to satisfy current peak week game and practice requirements (421 slot requirements per peak week in June equal to an 155 slot surplus) – were these fields upgraded and scheduled effectively. Consequently, there is no ***immediate*** requirement to buy and develop fields.

2: However, the margin is relatively thin for fields in the 65x225/280/300 preferred size (5 slot residual per peak week in June).

3: This assumes most fields are available during the week between 4:00 and 9:00 pm for the youngest ages, 5:00 and 10:00 pm for all others. It also assumes the average practice or game slot to be 1.5-2.0 hours for the youngest ages, and 3.0 hours for the oldest ages.

4: This also assumes games will be played between 8:30 am and 8:30 pm on Saturday and 1:00 and 8:30 pm on Sunday for the youngest ages, and 10:00 am and 10:00 pm on Saturday and 1:00 and 10:00 pm on Sunday for the oldest ages.

Short term strategies

5: ***Upgrade the existing*** smaller size fields at elementary schools and light the high school fields to provide practice and play capacity for this age group.

Long term strategies

6: ***Develop additional fields*** in the 65/90x300 foot configuration with lights to increase capacity for older age groups and competition tournaments – and to anticipate future population increase. Also, ***pursue user agreements*** for use of the competition facilities at Marylhurst and Portland Community Colleges.

These combined actions will increase the residual field capacity to 302 slots – enough to meet potential population needs.

**Soccer/football**

1: There are not enough total soccer/football fields in the park and school systems (not accounting for field quality) (433 slot capacity per peak week in October) to satisfy current peak week game and practice requirements (428 slot soccer and 113 slot football requirements per peak week in June equal to a 118 slot deficit) – were these fields upgraded and scheduled effectively. Consequently, there is an ***immediate*** requirement to buy and develop more soccer fields.

2: The margin is very thin for fields in the 159/180x300/360 preferred soccer field size for (a shortage of 146 slots per peak week in October).

3: This assumes most fields are available during the week between 4:00 and 7:00 pm for the youngest ages, 4:00 and 10:00 pm for all others. It also assumes the average practice or game slot to be 1.0-2.0 hours for the youngest ages, and 3.0-4.0 hours for the oldest ages.

4: This also assumes games will be played between 8:30 am and 7:00 pm on Saturday and 11:30 and 7:00 pm on Sunday for the youngest ages, and 9:00 am and 10:00 pm on Saturday and 12:00 and 10:00 pm on Sunday for the oldest ages.

Short term strategies

5: ***Develop additional soccer fields*** in the 180/210x300/360 foot configuration with lights to increase capacity for older age groups and competition tournaments – and to anticipate future population increase. Also, ***pursue user agreements*** for use of the competition facilities at Marylhurst and Portland Community Colleges.

Peak week requirements

# Athletic field summary requirements - existing population and teams

| | | Field size requirement | Field surface | Peak capacity practice and game slots | Number of existing fields | Existing field capacity | Field requirement for games and practices | Net difference | Number of fields per plan* | Proposed field capacity | Field requirement | Net difference |
|---|---|---|---|---|---|---|---|---|---|---|---|---|

Good - artifical turf, grass or all-wather surface fields in good condition with few bare spots or weeds. Goal posts or backstops are in good condtion. May include site amenities such as lights, restrooms, storage, dug-outs, or large bleachers. Fields are usually irrigated and on-going maintenance is evident.

Average - soil, and/or rubber mix fields or grass fields with uneven surface or with some ruts, stones, etc. May show evidence of poor drainage. May include additional amenities such as bleachers or water fountains. May or may not used be irrigated. Maintenance is limited and some renovation is needed to maximize capacity.

Poor - field has cinder or cintrex surface or contains numerous ruts, rocks and/or weeds. Field is not used irrigated. Amenities limited to backstops or goal posts which may be too small and/or in poor condition. Fields may have severe drainage problems, uneven surfaces or slope in one direction. Complete renovation is needed. Receives minimum maintenance under present conditions.

* indicates number of teams indicating use of field divided by number of fields per site.

Good - artifical turf, grass or all-weather surface fields in good condition with few bare spots or weeds. Goal posts or backstops are in good contioin. May include site amenities such as lights, restrooms, storage, dug-outs, or large bleachers. Fields are usually irrigated and on-going maintenance is evident.

Average - soil, and/or rubber mix fields or grass fields with uneven surface or with some ruts, stones, etc. May show evidence of poor drainage. May include additional amenities such as bleachers or water fountains. May or may not be irrigated. Maintenance is limited and some renovation is needed to maximize capacity.

Poor - field has cinder or cintrex surface or contains numerous ruts, rocks, and/or weeds. Field is not irrigated. Amenities limited to backstops or goal posts with may be too small and/or in poor condition. Fields may have severe drainage problems, uneven surfaces or slope in one direction. Complete renovation is needed. Receives minimum maintenance under present conditions.
